| 0 to 30% of Range: ±(0.03% of Full Scale) |
| 30 to 110% of Range: ±(0.1% of Reading) |

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

All models indicate vacuum, but vacuum specification (typical) applies to 30, 100, and 300 psi models only.

Not recommended for continuous use at high vacuum. Refer to XP2i-DP data sheet for gauges that are intended for continuous high vacuum use.

DIFFERENTIAL PRESSURE MEASUREMENT UNCERTAINTIES WITH TARE

The Tare function can improve measurement uncertainties on two modules with the same full scale pressure range installed into one nVision Reference Recorder. Requires the use of an equalizing valve.

The following specifications apply to the measurement system with a logging interval of 1 second/reading:

<table>

Unit must be enabled in CrystalControl

DIFFERENTIAL PRESSURE MEASUREMENT UNCERTAINTIES WITHOUT TARE

The total nVision Reference Calibrator measurement uncertainty in the ΔP mode configuration will need to consider the uncertainties of both pressure modules. We recommend the module uncertainties to be combined with the preferred square root of the sum of the squares (or "root sum squares") method.

The following table lists the possible combinations of using Pressure Modules (PM) with different accuracy statements.

The uncertainties reported below are without the use of the Tare feature, which will greatly improve your measurement uncertainty.

<table>

**SENSOR**

- **Wetted Materials:**
  - (WRENCH TIGHT) 316 stainless steel
  - (FINGER TIGHT) 316 stainless steel and Viton® (internal o-ring)

- **Diaphragm Seal Fluid:** Dow Corning® 200

- **Connection:** Crystal CPF Female

---

**BAROMETRIC REFERENCE (BARO)**

- **Accuracy:** ± 0.00725 psi, ± 0.5 mbar
- **Range:** 10.153 to 15.954 psi, 700.0 to 1100.0 mbar
- **Units and Resolution:**
  - psi ............... 0.001
  - inHg .............. 0.001
  - mmHg ............. 0.01
  - mbar ............. 0.1

- **Pressure Connection:** Cylindrical sensor fitting of 5.8mm OD. A flexible 4.8 mm [3/16"] ID tube is recommended to connect for calibration.

- **Mounting:** Secured using a 3/8" 4-40 plastic screw.

---

All welded, with a permanently filled diaphragm seal.

Metal to metal cone seal; O-ring can be removed if necessary.

1/4" medium pressure tube system compatible with HIP LM4 and LF4 Series, Autoclave Engr SF250CX Male and Female Series.

CPF Adapters to NPT, BSP, and M20 available.

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

Exposure to environmental extremes of temperature, shock, and/or vibration may warrant a more frequent recertification period.

Other units available depending on the installed modules.
Current, Voltage, & Switch Test Module (MA20)

Intended for use with a 4-20mA loop measurement. This module is also capable of measuring supply voltages and has an auxiliary fixed output for use in switch open/closure testing. Each MA20 module includes a super flexible silicone test lead kit (P/N 3952).

### CURRENT & VOLTAGE MEASUREMENT

#### Current (mA) Input

- **Accuracy:** ±(0.015% of rdg + 0.002 mA)
- **Range:**
  - 0 to 55 mA (MA20+)
  - 0 to 25 mA (MA20)
- **Max Allowable Current:** 93.3 mA
- **Resolution:** 0.001 mA or 0.01%
- **Units:** mA, % 4-20, % 10-50
- **Input Resistance:** < 17.2 Ω
- **Voltage Burden @ 20mA:** < 0.35 V
- **Voltage Burden @ 50mA:** < 0.86 V
- **HART Resistance:** 250 Ω
- **Connection:** 2mm jacks

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

**WARNING:** ATEX and IECEx certification does not allow the installation of two MA20 modules.

mA can be displayed as a percentage, where 0 to 100% corresponds to either 4 to 20 mA or 10 to 50 mA.

Jacks are compatible with safety sheathed banana plugs.

#### Voltage (VDC) Input

- **Accuracy:** ±(0.015% of rdg + 0.002 VDC)
- **Range:** 0 to 28 VDC
- **Max Allowable Voltage:** 30 VDC
- **Resolution:** 0.001 VDC
- **Units:** VDC

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

#### Switch Test

- **Switch Type:** Dry Contact
- **Closed State Resistance:** < 10 Ω
- **Open State Resistance:** > 10 MΩ

Switch state change indicated by bright green LED flash.

Switch test screen reports switch open, close, and deadband values.

---

ATEX and IECEx Scheme Entity Parameters

The MA20 Module has these specific input entity parameters:

- **Ui =** 28 V
- **Uo =** 6.6 V
- **li =** 93.3 mA
- **Io =** 4.45 mA
- **Pi =** 653.3 mW
- **Po =** 7.34 mW
- **Ci =** 0.36 uF
- **Co =** 0.5 uF
- **Li =** 39.1 uH
- **Lo =** 12 uH

* Dependent on the supply to the terminals but shall not be greater than 0.5 uF
** Total cable inductance between all modules
Temperature Module (RTD100)

Calibrated for Pt100 RTD / PRT (100 Ohms at 0°C Platinum Resistance Temperature Detector) sensors conforming to DIN/IEC 60751 (or IEC751) with US, Euro, or Lab calibration curves. An RTD is not included, but each RTD100 includes P/N 3953 RTD Connection Kit.

</table>

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

The proper selection of the RTD sensing element is very important as the error associated with this device is the majority of the overall system measurement uncertainty. IEC 751 is the standard that defines the temperature versus resistance for 100Ω, 0.00385 Ω/Ω/°C platinum RTDs. IEC 751 defines two classes of RTDs: Class A and B. Class A RTDs operate over the -200 to 630°C range versus -200 to 800°C for the Class B elements. For example, the Class A uncertainty is about half that of the Class B elements as illustrated in the following table.

The proper selection of the RTD sensing element is very important as the error associated with this device is the majority of the overall system measurement uncertainty. IEC 751 is the standard that defines the temperature versus resistance for 100Ω, 0.00385 Ω/Ω/°C platinum RTDs. IEC 751 defines two classes of RTDs: Class A and B. Class A RTDs operate over the -200 to 630°C range versus -200 to 800°C for the Class B elements. For example, the Class A uncertainty is about half that of the Class B elements as illustrated in the following table.

### ATEX and IECEx Scheme Entity Parameters

The RTD100 Module has these specific input entity parameters:

- **U_i = 0 V**
- **U_o = 9.73 V**
- **I_i = 0 A**
- **I_o = 1.6642 A**
- **P_i = 0 W**
- **P_o = 1.1 W**
- **C_o = 0.5 μF**
- **L_o = 12 μH**

*Total cable inductance between all modules*
**nVision Chassis (NV)**

### OPERATING TEMPERATURE

Temperature Range: -20 to 50°C (-4 to 122°F)

< 95% RH, non-condensing. No change in accuracy over operating temperature range. Gauge must be zeroed to achieve rated specification. Applies to all modules.

### DISPLAY

Screen: 255 x 160 pixel graphical display

Display Rate: 4 readings/second (standard) up to 10 readings/second (recording)

LCD readable in sunlight with bright backlight.

### POWER

4 x AA: 200 hours, typical

Ultra Low Power: Up to 60 days, typical*

Approved Batteries: The nVision is Intrinsically Safe only if powered by one of the following battery types:

<table>
<thead>
<tr>
<th>Approved Battery Type</th>
<th>Ta=</th>
<th>Marking</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rayovac Max Plus 815</td>

<td>Ex ia IIB T3 Ga</td>
</tr>
</tbody>
</table>

*2 installed modules, 1 reading per 5 minute recording interval, and 23°C ambient temperature.

**WARNING:** Do not use the mini-USB serial interface in hazardous locations.

**WARNING:** Replace batteries with approved type in non-hazardous locations only.

Uses 4 alkaline AA (LR6) batteries. Use of backlight reduces operating time.

**Energizer is manufactured by Energizer Holdings, Inc., and the Eveready Battery Company, Inc.**

### DATA/COMMUNICATION

Digital Interface: mini-USB

The mini USB will power the nVision with or without the battery pack installed.

**WARNING:** Do not use the mini-USB serial interface in hazardous locations.
**DATA Logging**

**Capacity:** Approx. 1,000,000 data points*

**Storage Type:** Non-volatile flash memory

**Fastest Interval:** 10 per second

**Slowest Interval:** 1 per hour

*Single Module Recording

The included CrystalControl software is compatible with 32 & 64 bit Windows 7 and Vista, and XP (32 bit only). Produces csv, xls, pdf, or signed pdf files, and uses Excel template files (samples included) to automatically format and graph data.

**ENCLOSURE**

**Weight:** 680 g (24.0 oz)

**Rating:** IP67

**Housing:** Impact resistant injection molded

**Keypad and Labels:** UV Resistant Polyester

**Mounting:** M4 x 0.7 [8 mm (0.31”)] deep threaded insert mounting locations

Weight includes one pressure module, one RTD module, 4AA battery module, and protective boot.

Submersible to 1 m for 30 minutes [IEC 60529].

LCD protected from impact damage by 1.5 mm (0.06”) thick polycarbonate lens.

Skydrol® compatible.

---

The included CrystalControl software is compatible with 32 & 64 bit Windows 7 and Vista, and XP (32 bit only). Produces csv, xls, pdf, or signed pdf files, and uses Excel template files (samples included) to automatically format and graph data.
STORAGE TEMPERATURE

Temperature Range: -40 to 75°C (-40 to 167°F)  
Batteries should be removed if stored for more than one month.

SPECIAL FEATURES

The following requires the use of our free CrystalControl software

Averaging Screen: Averages all points in a recording run.
Data Point Counter: Screen for counting the data points logged.
Display Screens: Turn on and rearrange display screens.

Estimated Recording Time: A CrystalControl calculation based on active screens and logging interval.

Live PC Graph: During a recording, graph directly to your PC.
Password Protect: Changes to configuration or userspan calibration factor(s).
Pressure Switch Test: Using a PM and MA20, get deadband and state-change pressure.
Remove: Unwanted pressure units.
Run Tags: Create and enable run tags that will identify logging runs.
Screen Numbers: Number each display screen to make writing procedures around the nVision easier.
Secure Documents: Download into secure pdf documents for tamper proof records.
Start-up Screen: Define a 32-character prompt which requires user acknowledgement at startup.
User Defined Unit: Define and display any pressure units not included, or to use the gauge to display force, level or other pressure related parameters.

CERTIFICATIONS

This product conforms to:

This product conforms to:

nVision complies with the Electromagnetic Compatibility and the Pressure Equipment Directives. Refer to the EC Declaration of Conformity for specific details.

The instrument was tested against AS/NZS 3584, C-tick EMC/EMI requirements.

XP2i is approved for use as a portable test instrument for Marine use and complies with Det Norske Veritas’ Rules for Classification of Ships, High Speed & Light Craft and Offshore Standards.
### ACCESSORIES (Included with NV)

**Soft Carrying Case P/N 4087**
Durable, padded case with separate pockets for your nVision and accessories.

**Protective Boot P/N 3985**
Shock resistant protection, low durometer, Skydrol resistant.

**Mini-USB Cable P/N 3951**
Connect to your nVision with 6’ (1.8m) cable.

### COMPLIMENTARY PRODUCTS

Crystal Engineering offers a wide range of products that work with the nVision:
- Fittings that connect without tools, safely and without leaks
- Lightweight, super flexible high pressure hoses
- Fitting kits and adapters
- Pneumatic hand pumps
- Hydraulic hand pumps
- Portable pressure comparators
- Software, for the quickest way to calibrate pressure transmitters and gauges

Dow Corning is a registered trademark of Dow Corning Corporation.
